

Grounds Maintenance & Landscaping Services

Ornamental lawns maintained by my ground maintenance team to our usual standard.

Weekly hedge and lawn maintenance at one of our school sites.

One of our clients from 2022. The previous franchised contracting business had left the site in a mess and this hedge is one example. We decided to bring our hedge flail out which is able to tackle unruly growth such as this with ease. This was completed in just 1 hour and the finished result is startling.

**Collecting our new Major TDR 16000
professional sports mower, replacing
our existing unit with our Valtra
N154.**

Sports field mowing carried out by our director Andy, a job he takes great pride and enjoyment in, as its important for him to remain an owner operator.

Our sports fields are maintained to the highest standards which is reflected in the value of our investment in good quality machinery. This unit alone has a value of £114,000.

Our laser guided line markers allow us to produce perfectly straight lines on grass, 3G, astro turf and tarmac

A recent addition to our equipment list, the weed brush. This is used to clear moss and algae from kerb and building edges, along with larger shaded areas where moss has become a problem creating a slip hazard. The weed brush is our mechanical solution, which we combine with scheduled chemical treatment to prevent the same reoccurrence..

As an evolving company we are continually working to improve our service standard and tackle new and existing problems that our clients ask us to resolve. The weed brush has now been added to many of our school SLAs.

Landscape project designed by our director, Andy, for Stretford Grammar 2014 utilising a local architect to help visualise a design for the client before the project commenced. This was built and installed by Andy and the team including Andy's father who also has a long-standing ground maintenance company.

Before

We have carried out the ground's maintenance and tree work at Loreto Grammar in Altrincham for over 11 years, with several larger projects undertaken along that journey including utilising disused green space areas as shown in the images.
